SUMMARY

Software Engineer with hands-on experience building responsive web applications using React.js, Next.js, JavaScript, and Tailwind CSS. Completed a web development internship contributing to production-ready frontend applications using Git-based workflows. Strong foundation in modern web development, UI/UX implementation, performance optimization, and collaborative software development, with a passion for building scalable, user-focused applications.

KEY SKILLS

Frontend: React.js, Next.js, JavaScript, HTML, CSS, Tailwind CSS

Programming: JavaScript, Python, Java

Databases: MySQL, MongoDB

Tools & Platforms: Git, GitHub, Vercel, VS Code

Web Technologies: REST APIs, Responsive Web Design

INTERNSHIP EXPERIENCE

Web Developer Intern — Zephvion Pvt. Ltd. *Feb 2026 – May 2026 | Hybrid*

- Developed responsive, reusable UI components using React.js, transforming design specifications into production-ready web interfaces.
- Collaborated with designers and developers in an Agile environment, using Git for version control and code collaboration to deliver high-quality frontend features.
- Applied component-based architecture, responsive design principles, and frontend best practices to build maintainable and user-friendly web applications.

PROJECTS

Sharma Mobile Store — Premium E-commerce Website *React, Vite, Tailwind CSS | 2026*

- Developed a modern, responsive e-commerce web application using **React.js, Next.js, and Tailwind CSS**, delivering a fast and intuitive user experience across desktop and mobile devices.
- Designed reusable UI components, interactive product showcases, custom loading screens, and responsive navigation following component-based architecture.
- Integrated WhatsApp-based purchase functionality and optimized application performance through efficient rendering, responsive layouts, and clean frontend practices.
- Deployed the application on **Vercel** and managed development using **Git** and **GitHub**.

Smart Video Steganography System *Python, OpenCV | Team Project*

- Built a system to securely embed and extract confidential data within video files using frame-level encoding and decoding logic.
- Applied video processing and multimedia analysis techniques to balance embedded data capacity against visual quality.
- Strengthened understanding of data security and secure embedding techniques through collaborative, team-based development.

Expense Tracker Web App *HTML, CSS, JavaScript | Oct 2024 – Dec 2024*

- Designed and built a web application to track and categorise daily expenses with a clean, intuitive interface.
- Applied UI design and planning principles to prioritise clarity and ease of use for everyday users.

EDUCATION

Bachelor of Engineering (B.E.) – Information Science & Engineering
Mangalore Institute of Technology & Engineering (VTU)

2022 – 2026 | CGPA: 6.8

CERTIFICATIONS & ACHIEVEMENTS

- Salesforce Trailhead: 60+ Badges (Admin, Developer, AgentBlazer Champion)
- Postman API Fundamentals Student Expert — NITK Surathkal (2024)
- Oracle SQL Bootcamp — Udemy (2024)
- Programming Certifications — Infosys (Java & Python, 2024) • 1st Place, “Arduino Innovation” (2024)
- Event Coordinator, Arduino Workshop — Dept. of ISE (2024)
- Participant, Code Crest (IoT & Cyber Security) — Dept. of CSE (2025)
